

I just wanted to comment on SBC's entry into the Michigan long distance market. I feel as a Michigan consumer, that we are playing on an uneven field. SBC continues to lease lines to CLEC's at bargain basement prices, yet those same CLEC's fight tooth and nail to stop SBC from entering the long distance markets. Please help save local jobs and encourage real competition by passing SBC's application for long distance in Michigan. Please look the other way at the CLEC's lobbyists and do what is right for the state of Michigan.
